

List of Tables

Q1. How nervous are you about the 2020 presidential election?	2
Q2. How concerned are you about the spread of the coronavirus outbreak that originated in China?	4
Q3. Do you currently have any COVID-19 symptoms (fever, cough, shortness of breath)?	6
Q4. Do you know what you should do if you think you or a loved one has COVID-19?	8
Q5. Have you changed any daily behaviors in response to the coronavirus, such as washing your hands more or touching your face less?	10
Q6. What's your day-to-day life look like right now?	12
Q7. What state are you currently in?	15
Q8. Do you understand your state's social distancing guidelines?	27
Q9. How is the pandemic affecting your mental health?	29
Q10. How concerned are you about coronavirus' impact on the American job market?	31
Q11. Do you expect to have student loan debt when you graduate?	33
Q12. How worried are you about being able to make your student loan payments after graduation?	35
Q13. How much money do you have in savings?	37
Q14. Are you changing your plans for the fall semester in light of coronavirus?	39
Q15. Why do you plan on transferring?	43
Q16. Why do you not plan on enrolling in the fall? Select all that apply.	44

Survey Methodology

This survey was designed and conducted by College Pulse. Interviews were conducted in English among a sample of 1500 undergraduate students who are currently enrolled in the U.S.

The initial sample was drawn from College Pulse's Undergraduate Student Panel that includes over 240,000 verified students representing more than 800 different colleges and universities in all 50 states. Panel members are recruited by a number of methods to help ensure diversity in the panel population, including web advertising, permission-based email campaigns, and partnerships with university organizations.

To reduce the effects of any non-response bias, a post-stratification adjustment was applied based on demographic distributions from the 2017 Current Population Survey (CPS). The post-stratification weight rebalanced the sample based on the following benchmarks: age, race and ethnicity, and gender. The sample weighting was accomplished using an iterative proportional fitting (IPF) process that simultaneously balances the distributions of all variables. Weights were trimmed to prevent individual interviews from having too much influence on the final results.

The margin of error for this survey is $\pm 2.9\%$. Margins of error are typically calculated on probability-based samples and are not technically correct for non-probability online samples. We supply them here to provide a general assessment of error ranges that may be associated with the data.
